

# EuroShop Retail Design Award '17

Na Euroshop realizam-se os **Euroshop Retail Design Awards** apresentamos os nomeados e os vencedores em 2017

## **Award**

EuroShop is the world's biggest trade fair for capital goods in the retail sector. The topics at EuroShop range from shopfitting, store design, architecture, lighting, refrigerating technology, through visual merchandising, display advertising and POP marketing, to IT and security technology. It was launched by EHI in 1966, since when it has been staged by Messe Düsseldorf with EHI's technical support. As part of the trade fair, EHI and Messe Düsseldorf have presented the EuroShop Retail Design Award (ERDA) for the three most convincing store concepts worldwide since 2008.

## **Categories**

Award categories have deliberately not been defined so as to enable projects to enter the contest irrespective of sector, location and retail format and thus to reflect the whole variety of international retail design.

Please consider: It is not suitable to submit shopping centers as a project, since shopping centers include many different stores and designs while this award solely evaluates the interior design of one single store/department store/restaurant etc.

## **Who can take participate**

Entries can be submitted by retailers, designers, architects, shopfitting companies or suppliers to the shopfitting industry, as well as the committee of experts.
